

1997 Div vs Prec.

Previously showed results from Adam's Gan run. We picked a range (day 285-286.5) from the movies.

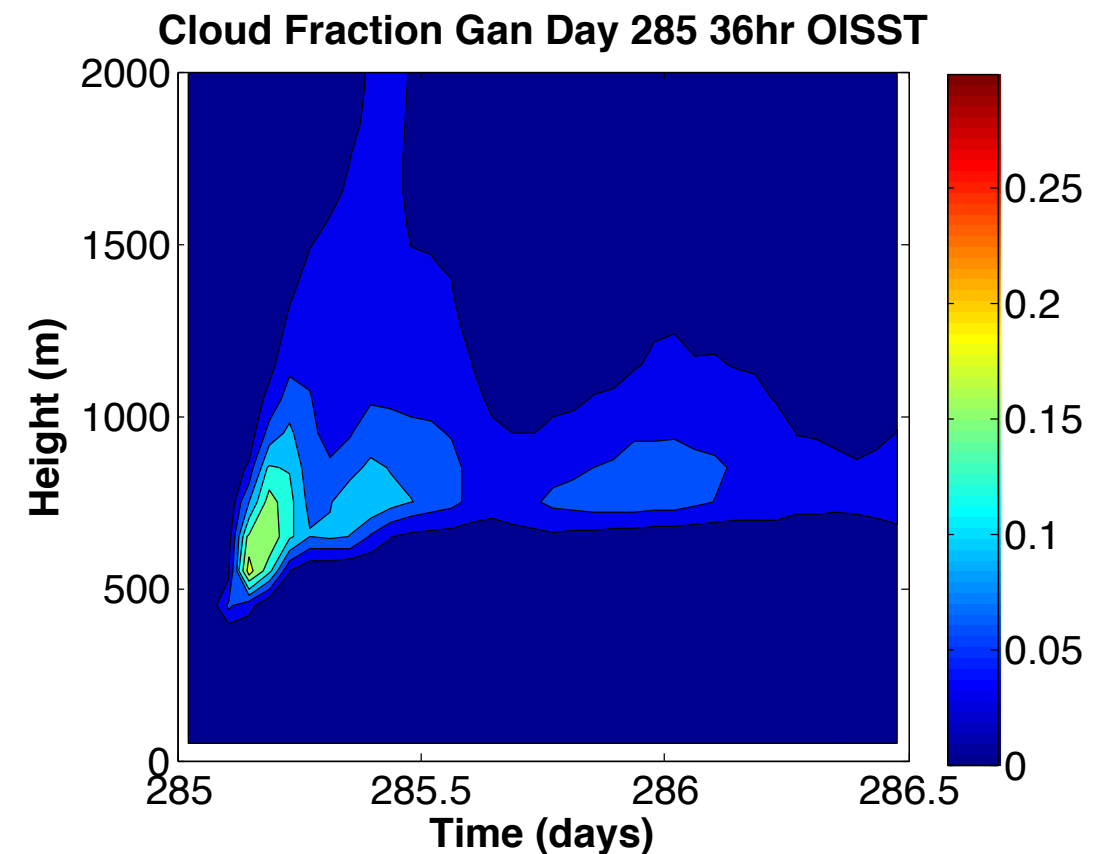

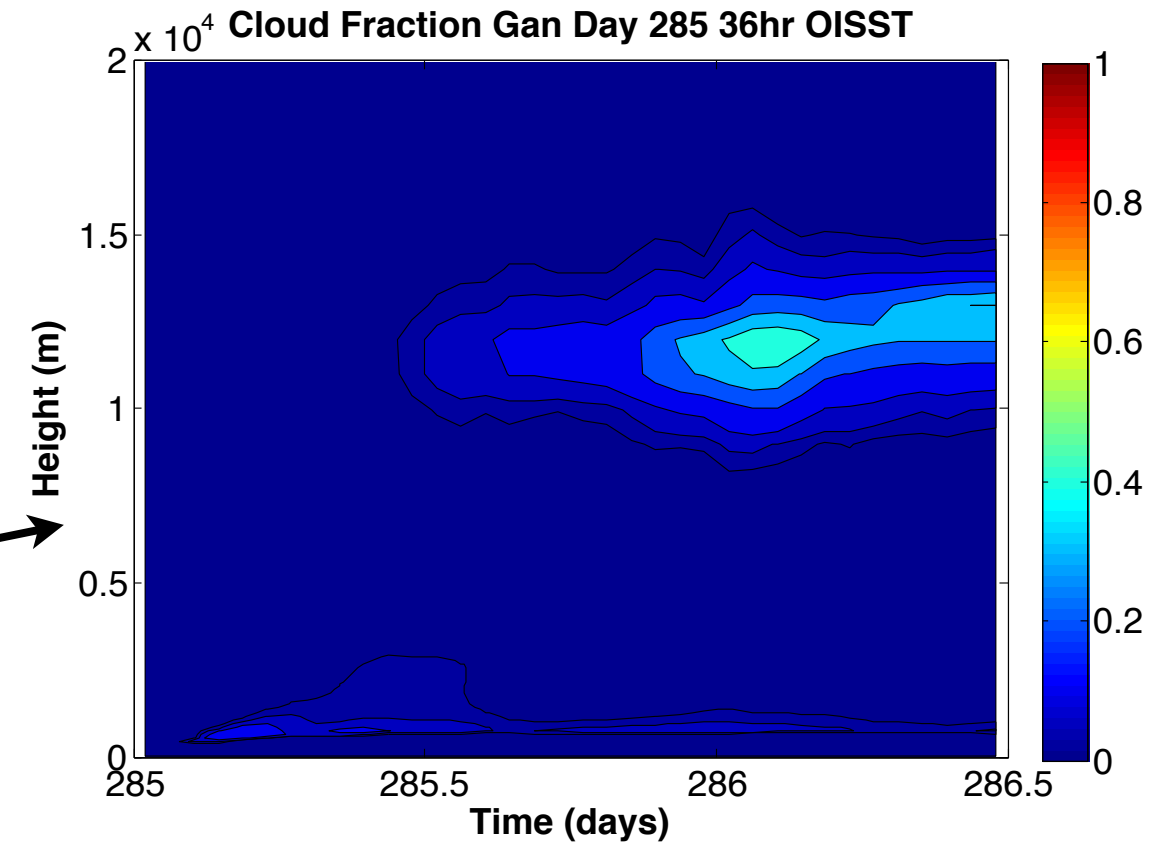

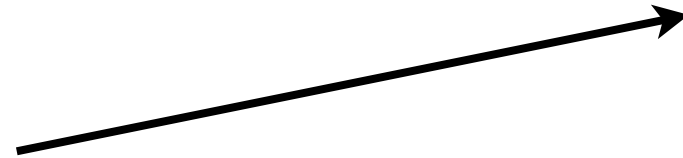

Problem: SSTs are wrong.

SSTs allowed to change.

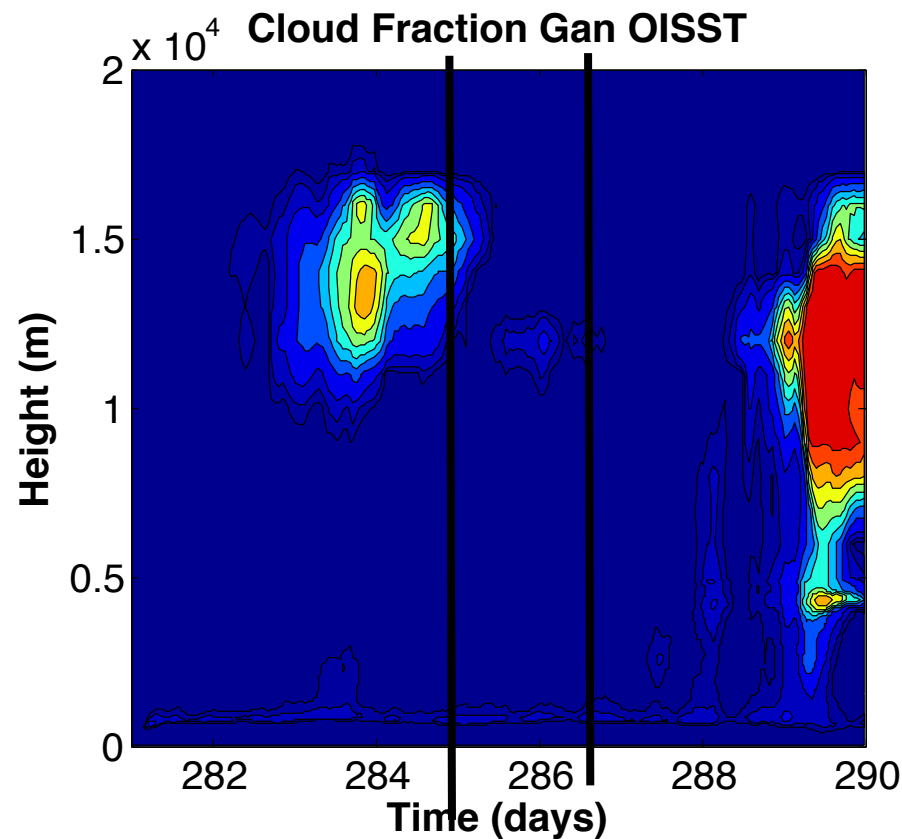

My run, start day 285

Where'd all the ~12km cloud
come from?

Adam's Run

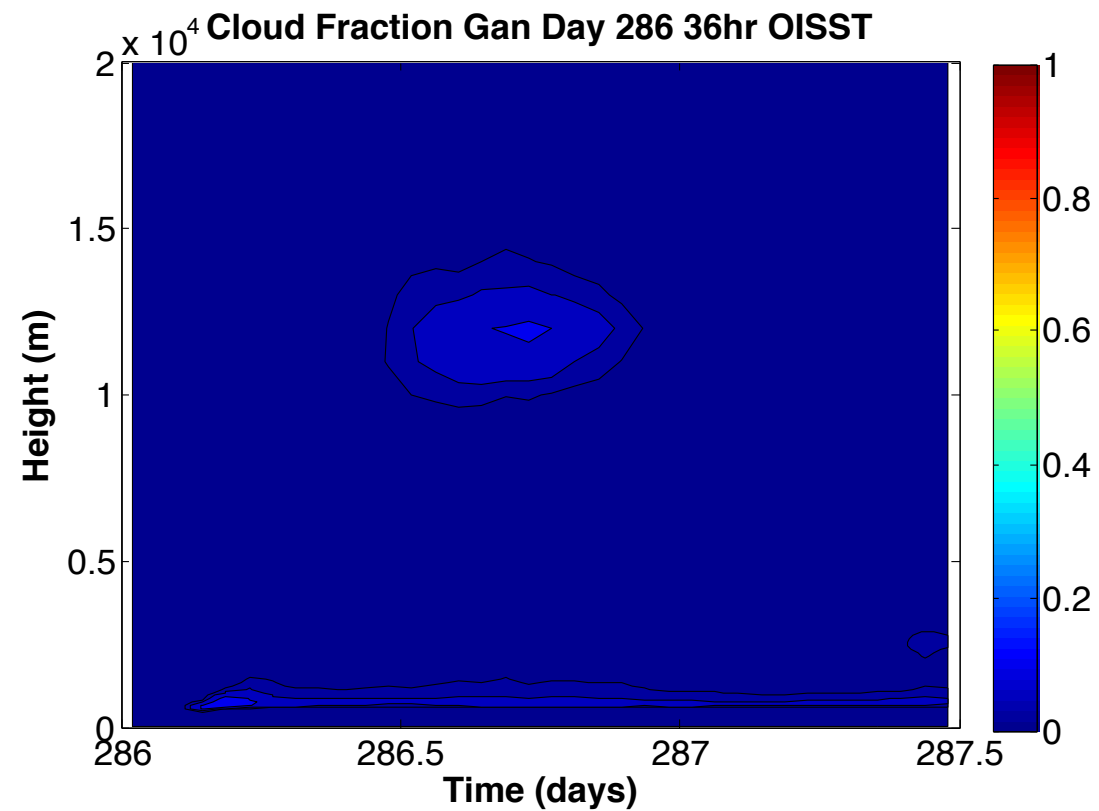

There's
upper-level
clouds in
day 285
now.
Perhaps
day
286-287.5
is better.
